# Introduction:

Phoenix sport club .Basically we work with a membership management domain .In this project we have four different process Admin, Management, Member, Service Provider. Every domain have different work. Admin have many facilities he can add delete of player and and modify the player information. Management can also do add and delete player from the system and modify the player information .Member have multiple feature he can add and delete the player and he can see the contribution of the club ,see the donation history etc. Service provider can arrange any sort of friendly match and as well as arrange any meeting etc.
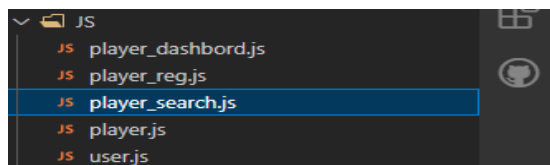

Project Folder Structure:

:

Phoenix Roar Sporting Club

Impact of this Project:

We work in membership management domain. The most important benefit is that anyone can easily look up the organization and find you online. Sports fans, like other Internet users, are always searching for interesting sports news and information. When we have a website that's regularly updated, people can instantly become more credible as a source of reliable sports news and also sees the club matches and if any teems wants to organized any friendly match they can easily apply and the club authority organized it . It's very easy to use for urban city people to manage fields to play any sort of games but using the phoenix sporting club it's very easy to use and get this sport related facilities. Finally, a website allows you to be in full control over your online presence. A website for your sports organization will bring you many benefits, from making your organization more discoverable to helping

American International University-Bangladesh (AIUB)
